The NORTEC Speed Lace System is compatible with the Running Micro Gaiter by NORTEC. It enables exchange, fast, easy adjustment of the laces, ensuring they never untie or have loose ends. This repair kit contains 1 pair of all relevant replacement tools for quick repairs of your Running Micro Gaiter Speed Lace System.

INSTRUCTION VIDEO »

We guide you through:
How to install your
Speed Lace System
to your Micro Gaiter.

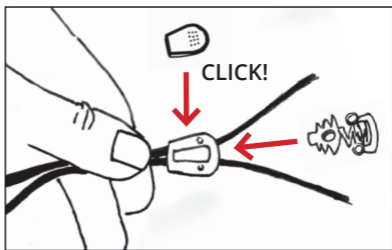

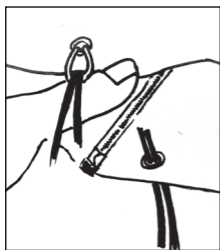

STEP by STEP instruction

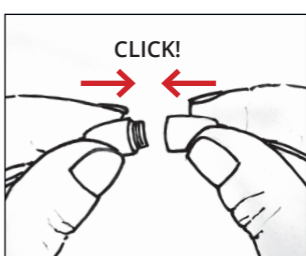

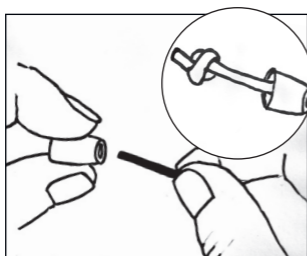

Remove the entire Speed Lace System of your damaged Running Micro Gaiter. If necessary, cut the lace with scissors.

Build a loop in the middle of the lace (1) and pull it through the eyelet on the outer side of your gaiter. Then thread the ends of the lace through the loop and pull tight.

Take the loose ends of your lace and thread them from the outside through the eyelet on the other side of the gaiter. Attach the trimmer (2) as shown. First slide the housing, then put the spring in the housing and close everything with the cover. The closing can possibly just be done with a little force.

Now put the locking eyelets (3) on both loose ends and close the ends of the speed lace with a simple knot. Finally, put the eyelets into each other. With one last click you have repaired your Micro Running Gaiter.
